It has taken a special training and talent to reveal the depths of Hahnemann's genius, which has lain hidden for over 200 years. Thanks to Steven Decker's meticulous research and command of the German language, we now have available the full extent of Hahnemann's medical system, a powerful means to face the complex, chronic cases of the modern era. Steven Decker is the translator of the extended Organon, first used as the basis for the Wenda Brewster O'Reilly edition and now available in its original form in e-format from amazon.com. It is a MUST-have for any serious homeopath or researcher. Mr. Decker will provide us with the keys to more fully understanding Hahnemann's foundational works and how they provide the basis for a truly integrated system of medicine.

12:00 to 1:30 LUNCH: (you are on your own)

1:30 to 3:00 **Live Blood Analysis: Modern Insight, Ancient Principles**  
by Linda Clifford  
DHHP, HD(RHom.)

New forms of patient analysis constantly emerge in the natural health field. Have you considered the role and value of live blood analysis? Linda Clifford has been practicing and teaching the integration of live blood analysis and Hahnemann's medical system for many years. Come and learn from this expert. Find out how you can improve your knowledge of the patient and your treatment approach!
